

DO NOT increase the number of stations a conglomerate can own. I feel that Chairman Powell should be impeached from his position for blatant efforts to keep this issue from the public and refusing to allow its open airing. I urge the commission to retain the current rules and vote down this Docket. I will support a more complete investigation into the reasons behind the chairman's excessive zeal and support for this particular action. This is not a public interest action. It is market manipulation to give networks increase income from local station profits. This ONLY helps the rich and has nothing to do with increasing diversity. PWL
